

# Orgone Effects® Geoclense® Testing

## Orgone Effects® Geoclense® Testing

Evidence how the Geoclense is able to ionize drinking water captured by GDV Kirlian Photography.

This test was done using a special attachment to the Kirlian Camera which allowed us to test the energetic qualities of tank water. The image on the left shows a drop of tank water without a Geoclense® operating, which shows the water image distorted. The right image shows a drop of tank water with a Geoclense® operating. Water is like a person, it reacts to good and bad energy.
